Client budget

SCHEDULE

Signature of the Contract: April 2005

Start of Operation: December 2005

Contract period: 7 + 2 years

PROJECT DESCRIPTION

Design, implementation and operation of an Electronic Toll Collection interoperability system (clearing house), called Information Exchange Agent (IEA) for the toll road network in Ireland.

IEA ensures a continuous exchange of ETC data between all toll facility operators in Ireland allowing transparent cross billing.

IEA allows a tag user to cross any toll facility in the country with a single tag.

Total contract value: €4.6 m

ROLE OF EGIS PROJECTS

Design and supply of the IT system on a turnkey basis

Operation and maintenance of the system

Help desk support to toll road operators
